

CONTACT LENS DISCLOSURE

Contact lenses are a medical device that if not fit properly can endanger the health of your eyes. Because contact lens fitting requires additional tests, not included in your annual routine exam, we charge a contact lens fitting fee. Included in our fitting fee are diagnostic contact lenses and follow-up visits, as long as they are within sixty days. To ensure a successful result with your contacts, follow up exams are necessary to check the vision and fit of the contacts. With your timely participation in contact lens follow-ups we can ensure your contact lens experience is enjoyable.

I understand the final contact lens prescription will not be dispensed until all the follow up appointments are kept.
